

AMAR THAKARE

Cloud Engineer

thakreamar2002@gmail.com | +91 8390877703 | [LinkedIn](#) | [GitHub](#)

SUMMARY

MCA graduate and Cloud Engineer with hands-on experience deploying and managing applications on AWS (EC2, S3, IAM, SQS) and Linux-based infrastructure, backed by strong backend development skills in Python/Flask and relational databases (MySQL, SQLite). Practical exposure to cloud architecture, virtualization, scalable deployment, and infrastructure monitoring with AWS CloudWatch from a cloud computing internship. Built and deployed a full production-style application to AWS EC2 end to end. Seeking an entry-level Cloud Engineer role to design, deploy, and maintain reliable cloud infrastructure.

EDUCATION

MCA (Master of Computer Applications) RTM Nagpur University	2024 – 2026
B.Sc. Computer Science Sant Gadge Baba Amravati University	2020 – 2023

TECHNICAL SKILLS

Cloud Platforms: AWS — EC2, S3, IAM, SQS, Cloud Architecture & Deployment
DevOps & Infra: Docker, Git/GitHub, Infrastructure Monitoring & Logging (AWS CloudWatch), SDLC
Operating Systems: Linux, Bash Scripting, Windows
Languages: Python, SQL, C++, JavaScript
Backend & APIs: Flask, REST API design, OpenCV, NumPy
Databases: MySQL, SQLite
Tools: VS Code, Jupyter Notebook, Power BI, HTML/CSS

EXPERIENCE

Cloud Computing Intern TechnoHack Solutions Pvt. Ltd.	Feb 2026 – Jun 2026
- Provisioned, deployed, and secured cloud infrastructure hands-on using AWS EC2, S3, SQS, and IAM on Linux-based servers. - Applied cloud architecture and virtualization concepts to support scalable, production-style application deployment. - Built backend services in Python and Flask for cloud-hosted environments, applying REST API design principles. - Set up infrastructure monitoring and logging with AWS CloudWatch, and used Bash scripting to automate routine performance-tracking tasks.	

PROJECTS

Cloud-Based Smart Attendance System — Python, Flask, OpenCV, SQLite, AWS EC2	2026
- Deployed a full-stack Flask application on AWS EC2, enabling remote access and scalable cloud-based operation. - Engineered a REST API backend with Flask and SQLite to automate end-to-end attendance management. - Implemented real-time face recognition with OpenCV to automatically track and log student attendance. - Reduced manual attendance processing and improved data consistency through cloud-hosted automation.	
Blog Writing Website — PHP, MySQL, HTML, CSS	2025
- Built a full-stack blogging application with secure authentication and role-based access control. - Implemented CRUD operations for creating, editing, and managing content, backed by a MySQL data layer. - Designed a responsive UI for consistent usability across desktop and mobile devices.	
Water Billing System — Visual Basic, MySQL	2023
- Developed an automated billing system to streamline water usage tracking and payment processing. - Implemented automated billing calculations and data validation to reduce manual processing errors.	

CERTIFICATIONS

- Microsoft Azure Essentials — Oct 2024
- Google AI Essentials — Nov 2024
- Getting Started with Data Analytics on AWS — Feb 2025
